PROFESSIONAL SUMMARY

Performance-driven Computer Science undergraduate with hands-on expertise engineering full-stack, responsive, and animation-rich web applications using React.js, Node.js, REST APIs, Supabase (PostgreSQL), Three.js, and GSAP. Strong foundation in Data Structures, Algorithms, and System Design principles, backed by consistent competitive programming in C++. Passionate about building highly scalable, secure, and visually captivating digital products that solve real-world problems.

TECHNICAL SKILLS

Languages: C++, C, JavaScript (ES6+), SQL

Frameworks & Libraries: React.js, Node.js, Express.js, REST APIs, Three.js (React Three Fiber), GSAP, Tailwind CSS

Databases & Cloud: Supabase (PostgreSQL), Vercel, Render

Tools & Practices: Git, GitHub, JWT Authentication, Data Structures & Algorithms, Object-Oriented Programming

FEATURED PROJECTS

Plantio — Botanical Care & Plant Intelligence Platform

React.js | Node.js | Supabase (PostgreSQL) | REST API | iNaturalist API | Vercel | Render

- **Full-Stack Architecture & API Integration:** Engineered a responsive web application integrating iNaturalist and Wikipedia REST APIs to deliver real-time search, category filtering, and pagination across 300,000+ plant species.
- **Cloud Database & Persistent Auth:** Built a standalone Node.js backend with JWT authentication and integrated Supabase (PostgreSQL) for persistent user accounts, watering schedule tracking, and cross-device session synchronization.
- **Algorithmic Care Engine:** Developed an automated inference module parsing taxonomic metadata to dynamically generate customized watering frequencies, toxicity warnings, and light requirement guides for each species.
- **Interactive Care Tracker:** Implemented responsive user plant dashboards with custom photo uploads, watering reminder modal editors, and mobile-optimized grid filling layouts.

Interactive 3D Personal Portfolio

React.js | Three.js (React Three Fiber) | GSAP | Tailwind CSS | EmailJS | Vercel

- **Interactive 3D Graphics:** Built an immersive 3D hero section utilizing React Three Fiber featuring a mechanical keyboard model with real-time mouse-tracking rotation and dynamic ambient lighting.
- **Scroll-Driven Animations:** Implemented fluid micro-interactions and scroll-triggered motion effects (GSAP SplitText, BorderGlow carousel) across Hero, About, Work, and Contact sections.
- **AI Chatbot & SEO Optimization:** Integrated an AI conversational assistant for instant inquiry resolution and configured structured SEO metadata, achieving high performance and search visibility on Vercel.

Cocktail-Themed Motion Landing Page

React.js | GSAP | Vanilla CSS

- Designed and developed an animated marketing landing page featuring scroll-based storytelling, custom GSAP timelines, and smooth parallax transitions to optimize visual pacing and user engagement.

Competitive Programming & Algorithmic Problem Solving

C++ | Data Structures & Algorithms | LeetCode | CodeChef

- Solved 100+ algorithmic problems spanning Arrays, Strings, Dynamic Programming, Binary Search, Graph Traversals, and String Matching (e.g., Rotated Sorted Array Search, House Robber, Regular Expression Matching).

EDUCATION

Bachelor of Technology in Computer Science & Engineering

SR International Institute of Technology, Hyderabad

Expected Sept 2027

Intermediate Certificate (MPC)

Narayana Junior College, Madhapur, Hyderabad

April 2023
