SUMMARY

Detail-oriented Computer Science undergraduate (4th year) with hands-on experience building full-stack, responsive, and animation-driven web applications using React.js, Node.js, REST APIs, Three.js, and GSAP. Solid foundation in data structures, algorithms, and database design strengthened through consistent competitive programming in C++. Committed to writing clean, high-performance code and eager to contribute to a dynamic software engineering team.

SKILLS

Languages: C++, C, JavaScript (ES6+), HTML5, CSS3

Web & Frameworks: React.js, Node.js, Express.js / Native HTTP Server, REST APIs, Three.js (React Three Fiber), GSAP, Tailwind CSS, EmailJS

Tools & Platforms: Git, GitHub, Vercel, Render, VS Code, Google Search Console

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Competitive Programming, State Management, Authentication (JWT)

PROJECTS

Plantio – Botanical Care & Plant Catalog Platform | React.js, Node.js, REST API, iNaturalist API, LocalStorage, Vercel, Render

- Engineered a full-stack web application integrating the iNaturalist API, delivering real-time search, category filtering, and dynamic pagination across 300,000+ plant species.
- Built a standalone Node.js REST API with JWT authentication, enabling secure user login/signup and cloud data persistence with offline resilience via local synchronization.
- Designed an algorithmic inference engine that parses taxonomy and habitat data to generate species-specific care recommendations, including watering schedules and toxicity ratings.
- Integrated the Wikipedia API to surface plant care and diagnostic content, applying regex-based sanitization for clean, reliable rendering.

Personal Portfolio Website | React.js, Three.js (R3F), GSAP, Tailwind CSS

- Built an interactive 3D hero section featuring a mechanical keyboard model with real-time mouse-tracking rotation using React Three Fiber.
- Implemented scroll-triggered animations (GSAP SplitText, BorderGlow carousel) across Hero, About, Work, and Contact sections for a polished, motion-driven UX.
- Integrated a working contact form via EmailJS and deployed on Vercel; configured Google Search Console and sitemap for discoverability.
- Added an AI-powered chatbot to assist visitors and answer questions about the portfolio and projects in real time.

Cocktail-Themed Landing Page | React.js, GSAP

- Designed and built an animated marketing landing page with scroll-based storytelling and GSAP timeline animations.
- Focused on smooth transitions and visual pacing to create an immersive, brand-driven browsing experience.

Competitive Programming Practice | C++, LeetCode

- Solved 100+ problems spanning arrays, dynamic programming, binary search, and string matching (e.g., Rotated Sorted Array Search, Climbing Stairs, House Robber, Regular Expression Matching).

EDUCATION

Bachelor of Science in Computer Science

SR International Institute of Technology, Hyderabad — Expected Sept 2027

Intermediate Certificate (MPC)

Narayana Junior College, Madhapur, Hyderabad — April 2023
